

“ESRI ARCGIS IS THE WORLD’S FIRST COMPLETE GIS PLATFORM. WITH THE CONFIGURABLE CIM ADAPTOR FROM SIMILIX, IT’S SIMPLE TO BUILD INTEGRATIONS TO ADMS & SCADA SYSTEMS, POWER APPLICATIONS AND OTHER SYSTEMS THAT CAN HIGHLY BENEFIT FROM THE ARCGIS MASTER DATA ON ASSETS AND ELECTRICAL GRID CONFIGURATIONS”

Larry Young, Program Manager , Esri

Press release, 20th of July 2019

Esri ArcGIS Speaks CIM

Similix releases CIM Adaptor 1.3 for ArcGIS. With this release we make it even easier to setup integrations based on the Common Information Model (CIM). With the Similix CIM Adaptor, ADMS projects can focus on integrating business processes, instead of spending time and money on custom build solutions.

CIM is the way to integrate planning, operation and maintenance processes in the modern Electric Utility. Electric Utilities needs CIM based process integration between GIS and:

- Advanced Distribution Management Systems (ADMS)
- Power Applications
- Outage Management Systems (OMS)
- DSO/TSO reporting

The Similix CIM Adaptor for ArcGIS is a product made for Esri Customers, Distributors and Partners to simplify implementation and maintenance of CIM integrations.

A utility uploads the required CIM profile to the Similix CIM Adaptor and maps ArcGIS data. No coding needed. The Similix CIM Adaptor for ArcGIS supports mapping to any CIM Profile.

The Similix CIM Adaptor brings even more value out of the ArcGIS system by easily serving other business systems with asset and grid configuration data.

“At Similix we have worked dedicated with CIM integrations for ArcGIS since 2012. We have taken all our knowledge and experience and put this into a product. This will heavily reduce the effort required for our customers and partners to do the CIM data mapping and ensure all systems are updated in a single, transparent process” says Jesper Vinther Christensen, CEO & Founder of Similix.

The future for the CIM Adaptor is to support the Esri Utility Network.

“Esri ArcGIS is the world’s first complete GIS platform. With the configurable CIM adaptor from Similix, it’s simple to build integrations to ADMS & SCADA systems, power applications and other systems that can highly benefit from the ArcGIS Master Data on assets and electrical grid configurations”, says Larry Young, Program Manager , Esri

About Similix

Similix delivers software and consultancy to the global utility and telco industry based on the platforms from Esri, OSIsoft and Microsoft and also has a partnership with these companies. Similix is head quartered in Denmark with a branch in Virginia, US.

Similix products for the Esri ArcGIS platform:

- CIM Adaptor for ArcGIS
- Utility Network Migration Suite
- Sketch Tool for ArcGIS
- Load Flow Calculation for Electric Power
- Outage Management System for ArcGIS
